

# Task 2

**Objective:** Create a page header and a filter section above the table you built in the previous task, following the provided design specifications.

## Part 1: Page Header

### 1. Layout:

- Create a header that includes:
  - **Notification Icon:** Positioned on the left side.
  - **Language Button:** A button that opens a dropdown list of languages.
  - **Profile Icon:** With a dropdown for profile-related actions.

### 2. Styling:

- Ensure the header matches the design shown in the provided images.
- Use appropriate colors and styles from the attached resources.

### 3. Responsiveness:

- The header should be responsive and adapt to different screen sizes.

### 4. Icons:

- Use the provided icons for notifications, languages, and profile actions.

## Part 2: Table Filters

### 1. Filter Section:

- Create a filter section above the table with the following components:
  - **Search Text Field:** For searching through the table data.
  - **Filter Dropdown:** A single-select dropdown for filtering data based on a specific criterion.
  - **Groups Filter:** A multiple-select dropdown for selecting various groups.
  - **Export Button:** A button with a dropdown for exporting data in Excel and PDF formats.
  - **Select Columns Button:** A dropdown to choose which columns to display in the table.

### 2. Design Only:

- **Implement the filters as per the designs provided. The filters should have no functionality; they should be purely visual.**
- **Use the colors and icons from the attached resources to style the filters.**

### 3. Responsiveness:

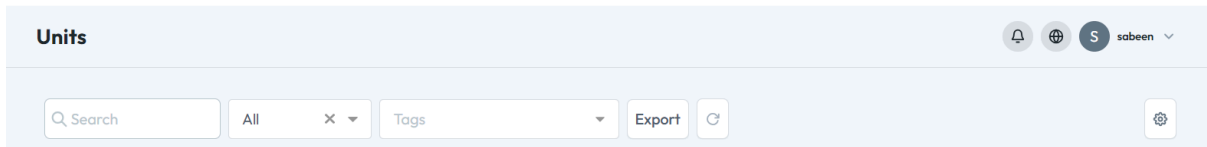

- **Ensure the filters section is responsive and looks good on different screen sizes.**

## Images:

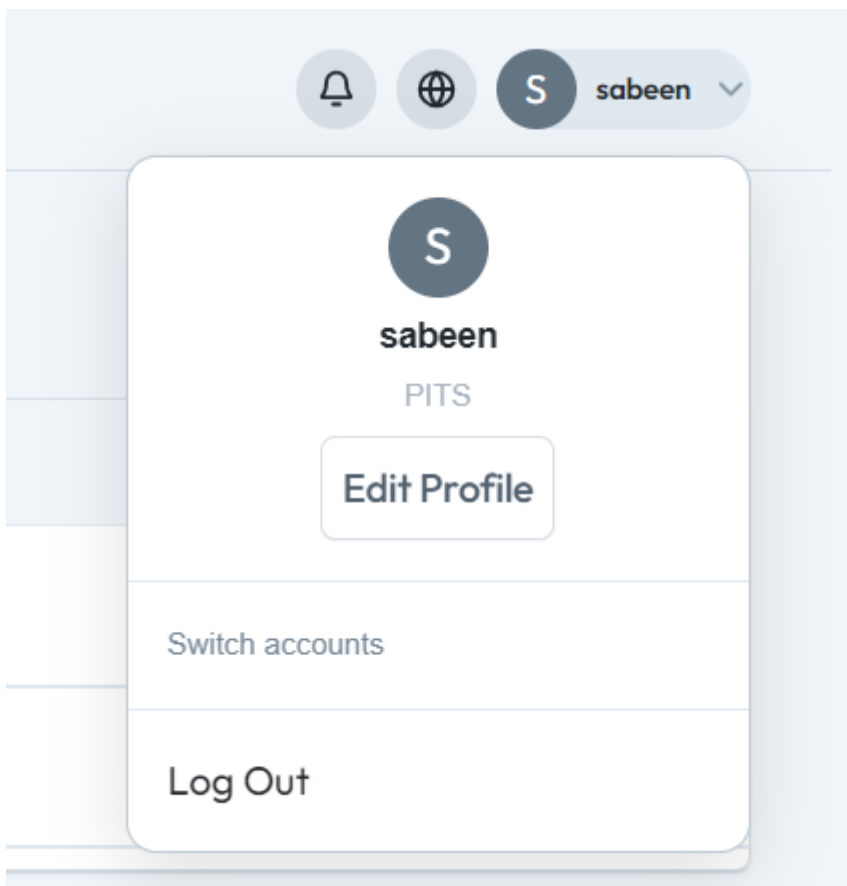

## Header and Filters:

### 1.Language Drop List:

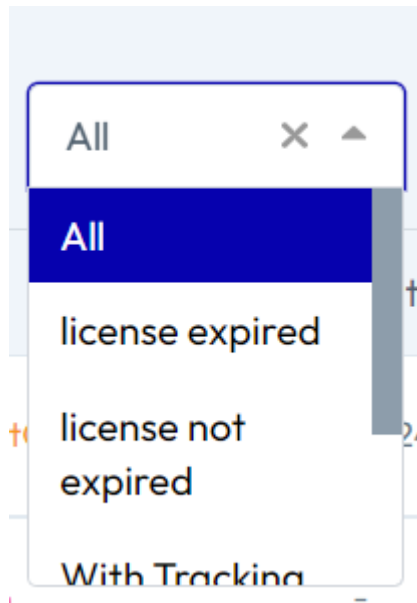

### 2.Profile Drop List:

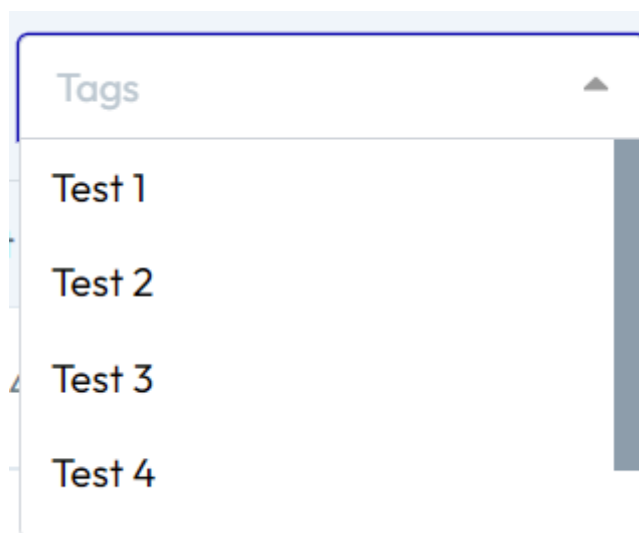

**\*Note:** Use your first and last name (e.g., Ahmed Mohammed). The profile image should display the initials from your first and last name (e.g., AM) with a randomly generated background color.

### 3.Filters Drop list:

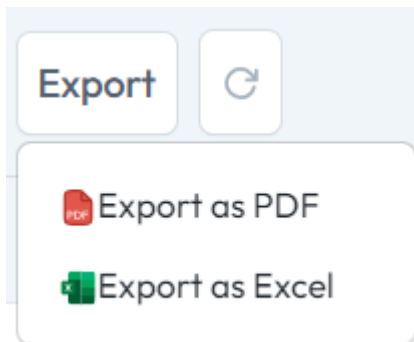

**\*Note :**Use this color selected value (#0601ae)

### 4.Groups Drop List:

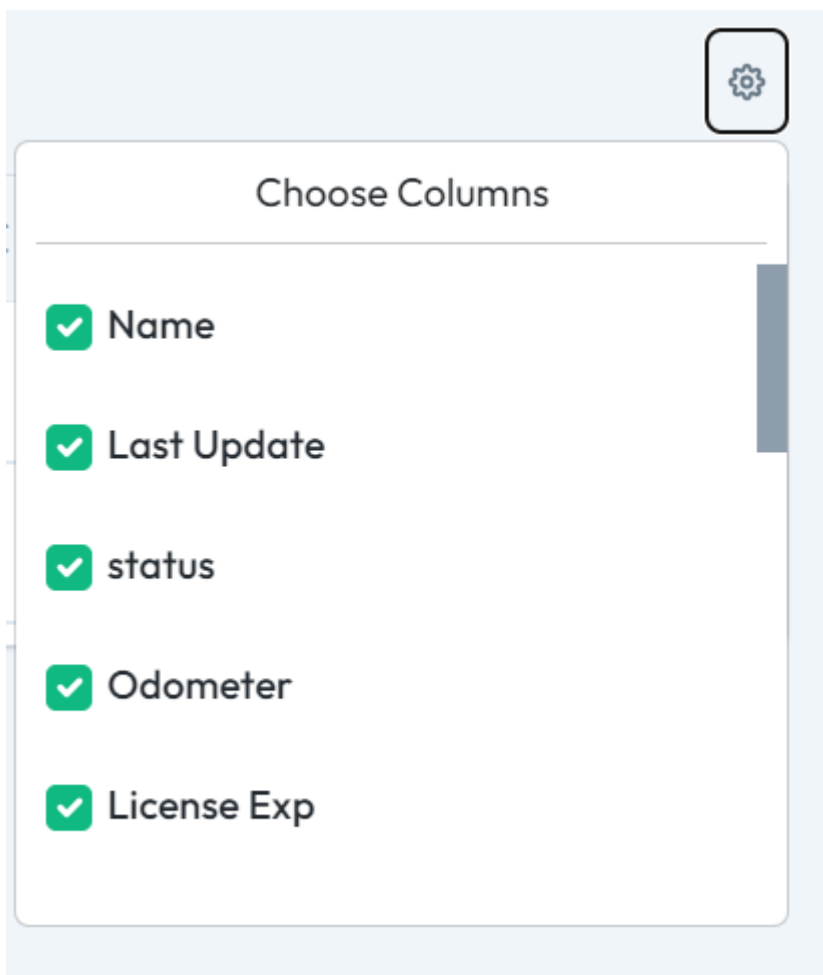

**\*Note:**Users can select multiple values.

### 5.Export Drop List:

### 6.Columns Checklist:

### Additional Notes:

- Design the UI to be user-friendly and responsive.
- Feel free to use any additional libraries or tools that you find suitable for the task.

**Submission:**

- Push your Vue.js project code to a GitHub repository.
- Deadline for submission: September 24th, 2024
